(646) 893-9136 • hello@kimsarabia.com

SOFTWARE AND APPLICATIONS

HTML5/CSS3, JavaScript, Git and GitHub, Bootstrap, Materialize, jQuery, AngularJS, NodeJS, ExpressJS, MongoDB, Gulp, SASS, LESS, Mongoose, Socket.io, Ionic, Photoshop, Illustrator, InDesign, Sketch

RECENT PROJECTS

Tech Nation (Ongoing) – *Content management system tailored for mobile retailers built entirely from scratch*
Contribution: Wireframing, prototyping, and developing front-end and 25% of the Angular MVC in tandem with teammates

Janus – *Emotion-based playlist selection web app that utilizes face recognition technology Microsoft Oxford API, along with Spotify API (Firefox only)*
Contribution: Prototyping, designing, and building out the user interface with HTML5/CSS3 and JavaScript

Jumpy Jeepney – *Mobile game based on the popular Jump Car, this time with the Philippine Jeepney*
Created the GUI and sprites in Adobe Suites, reformatted, tested and debugged existing source code in Unity3D, built in Xcode, and launched to App Store

EXPERIENCE

CONTRACT FRONT-END DEVELOPER *(October 2015-Present)*
Business IT Advantages, New York, NY
- Use a combination HTML, CSS, JavaScript, jQuery, Angular and additional frameworks and libraries to write web pages, assist back-end developer with coding and troubleshooting, and test code for consistency across all browsers and platforms.
- Execute UI/UX deliverables from start to end by collaborating on user experience planning with clients, researching interaction design trends, customers and multiple stakeholders.
- Create wireframes as well as visual design comps, using Photoshop, Illustrator, InDesign, and associated design tools, while following interface design patterns and standard UCD methodologies.

FREELANCE WEB & GRAPHIC DESIGNER *(January 2015 – Present)*
Freelance, New York, NY
- Create and develop concepts for print projects and digital design to clients in timely and professional manner using Adobe Suite (Photoshop, Illustrator, InDesign) as well as front-end web technologies (HTML5/CSS3).
- Produce creative designs for logos, websites, business cards, brochures, flyers, greeting cards, signage and other promotional materials for a diverse range of clients nationally.

DIRECTOR OF DEVELOPMENT AND DIGITAL COMMUNITY *(June 2015 – October 2015)*
Brandworkers, Long Island City, NY
- Designed and developed digital components of organization's audience-facing platforms, including: customizing an elegant, mobile-responsive event site through Splashthat.com; integrating custom code (HTML5/CSS3) into MailChimp, and all online/print materials of organization from conceptualization to launch.
- Built custom applications using the point-and-click capabilities of the Salesforce platform, contributed to designing data model for in-house fundraising applications, and also designed reports, dashboards, and portals

FINANCE AND OPERATIONS ASSOCIATE *(January 2013 – June 2015)*
Race Forward: The Center for Racial Justice Innovation | Publisher of Colorlines.com, New York, NY
- Automated Salesforce administration tasks and troubleshot issues for the Sales, Web, and Marketing departments.
- Constructed a trial balance in Excel format and recorded journal entries, conducted revenue and expense transaction research and verified accuracy and completeness of financial information reports.

IMMIGRATION PROGRAM ASSISTANT *(August 2011 – January 2013)*
The New York Immigration Coalition, New York, NY
- Managed and tracked voter data through the Votebuilder software system by NGP VAN as part of the organization's "Immigrants Vote!" campaign, providing NYC Civic Engagement working group with microtargeting abilities intended to increase voter turnout
- Contributed to building and maintaining organization website built on Joomla CMS using existing solutions, made design changes, and provided new content

EDUCATION

Live-In Software Development Immersion Training, **Coding House**, Fremont, CA
B.A., Political Science, **Indiana University,** Bloomington, IN *(With Distinction and General Honors Notation)*
GPA: 3.7
